

CURRENT OFFICERS

PRESIDENT: Spencer Cullen...(850)878-8409

TREASURER: Austin Tatum...(850)561-1400

NEWSLETTER EDITOR: Joe Doker... (850)509-1337 e-mail tws@redbaystudio.com

Next Meeting: Tues, November 9th @7:00 p.m.

The November meeting will be an open roundtable format and will be held at our regular meeting place, Tri States Automotive, 745 W. Gaines Street in Tallahassee. (see map on next page)

Meetings are held on the second Tuesday of the month.

Don't forget your **Show and Tell items**.

Highlights From the October Meeting

The October meeting was our Slide Show and Tell. The quality of the photos was very good as was the projection equipment provided by Austin. Here's a quick summary of the projects that were displayed.

Ed Garrett presented a number of fine projects that he has completed in recent years.

Airplane Wall Shelf. Measures about 4', old router motor for engine, wire spool hub for fuselage. Ed once heard loud noises when his son was about 5 and found him running across the shelf and jumping on his bed.

Rustic Pedestal Table. Made of scrap cherry from a neighbors tree, unique stand system, quite strong—Ed had a photo of it holding 70 pounds of books on the front edge.

Hot Tub Step Stool. Made of full 1" x 6" Teak from Lumber Liquidators, tile inserts.

Teak Garden Cart. Same Teak as step stool, routed name has hammered copper insets from scrap copper Ed found at a construction site.

Dream Shop Model. Ed built his dream shop as a model, then got some bids for the real thing. Best bid was \$120,000, so that project, like the model, was put on the shelf.

Book Shelf. Has much detailed embellishment, Ed says he "got carried away with the carving", Oak with carved Cherry figures applied.

“Meeting Summary” Continued from page 1

Joe Doker presented several projects that he completed over the past year for his family room.

Coffee Table and End Table. Mission style, made with 5/4 White Oak, finish is per Homestead Finishes schedule, mortise and tenon construction, under mount hidden drawer slide in end table.

Built-in Book Shelf. All frame and panel construction, hidden rope lighting in routed groove behind shelf unit face frame.

A/V Cabinet. Made of quarter sawn White Oak with mission finish, holds all A/V components including center channel and base speakers, doors have rattan centers instead of panels to allow for ventilation and sound transfer, mortise and tenon construction (74 mortise and tenon joints counting cabinet frame and doors), upper sliding shelves and “secret” side doors with automatic interior lights for accessing back of components.

We had good turn out for the Slide Show and Tell and members said they like the format and want us to do it again.

In addition to our scheduled Slide Show and Tell program, several members brought in items to share. **Val Tuck** showed us his new pocket hole system, and another member brought in an old chair that had some unusual problems. Members provided several good suggestions for repair. **Jim Gerus** was not able to get his photos in to us electronically so he took the time to print some out and brought in a poster board display of some of his recent projects.
